

QUESTIONS TO ASK AN ARCHITECT

We believe that collaboration is essential for a successful project. A genuine collaboration between a client, architect, contractor, etc. can create a work of art! A collaborative approach provides the best experience possible. Here are some questions to ask as you hire the best team possible for your project.

- How many years have you been in business?
- Have you worked on a similar project?
- Who will be my primary point of contact throughout the project?
- How will you ensure my project stays within budget and our established timeline?
- Do you have contractors and vendors to complete my entire project?
- If my project has special considerations (waterfront, zoning, landmark district), what is your experience in complex projects?
- What is your fee structure?
- Research their design aesthetic to ensure it aligns with yours and you feel confident they can deliver your vision.
- Do you enjoy their company? You will be spending a lot of time with your architect and trusting them with something so personal - your home! Not only is their experience crucial, but ensuring it's the right personality fit is important too.
